Getting Started

Control Stick Function

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from it's neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started. let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

Warning: Never insert or remove a Game Pak when the power is on!

- Make sure the power is OFF on your N64.
- Insert the WCW NITRO Game Pak into the slot on your N64.
- 3. Press firmly to lock the Game Pak into place.
- 4. Turn the power switch ON.
- 5. At the Title Screen, press START when prompted to begin GAME TITLE.

HIDDEN WRESTLERS

Backstage at WCW NITRO are dozens of wrestlers and managers waiting to be part of the action. You may encounter them as run-in characters causing interference or as part of WCW NITRO's Battle Royal mode.

Take control of these characters by winning the Tournament level. Winning tournaments as different characters allows you to take control of different hidden characters. Use the Save mode in the Controller Pak section of the Options Menu to hold onto the hidden characters you've gained.

When starting a game, you must load a previously saved game to reveal those hidden wrestlers you've already found. Once loaded, you can continue to find more hidden wrestlers and managers that are present in WCW NITRO.

Energy decreases as you get hit during the match. If you can avoid being punched or thrown around for a period of time, your energy will gradually increase. This goes for your opponents, too, so keep punishing them! Taunting the opponent during a match pleases the crowd and helps you regain health.

Basics of Play

MATCH LENGTH

Each wrestling match consists of one bout.

BEATING THE OPPOSITION

The winner of a match can be determined in four ways:

- A match can be won by pinning your opponent and holding him for a count of 3.
- A match can be won by default or disqualification if a player or opponent stays outside of the ring for longer than the time allowed.
- If the match is timed, the bell can determine the winner. The player with more energy at the end of the time allotment will be declared the winner after time expires.
- A match can be won by submission if a player or opponent is too weak to continue after being placed in an especially painful hold.

WINNING MATCHES

TOURNAMENT WIN

In a Tournament, the winner will be allowed to battle the next randomly chosen opponent.

EXHIBITION/VS WIN

At the end of an Exhibition or VS match, the game will return to the Title Screen.

BATTLE ROYAL WIN

In Battle Royal mode, the winner is the wrestler who remains as the last man standing after all others have been thrown over the top rope.

PAUSING/QUITTING THE MATCH

Press START to pause the game at any time. From the Pause Menu, you can continue the match, restart the battle from the beginning, or quit and return to the Title Screen.

The Moves

Nobody becomes a professional wrestler overnight. Practice and learn these moves to destroy the competition! All the button combinations refer to wrestlers facing right. Reverse the left/right +Control Pad controls for wrestlers facing left. Except where noted, all the moves on these two pages can be used by all wrestlers.
